

Session 8 - Let's get Classy

📅 Dates	@December 8, 2022
🕒 Type	📖 Lesson
☰ Topic	Live Class

Code Link - <https://bitbucket.org/namastedev/namaste-react-bootcamp/commits/1ea6b5ecfd7400c13d821639ae6b43f6108aaf9f>

Assignment

- Setup CI/CD pipeline? Host your website (using netlify, vercel, heroku, firebase).
- In React Router there are many ways of creating routes. Read the react documentation on the same.
- Why we use super() in Constructor?
- Why super is always in first line of the Constructor?
- Why we need to pass props in super(props)?
- Can we make useEffect function async? If not then, why?
- Read about all React LifeCycle Methods.

Coding Assignment:

- Play with the flow of code with nested children and see the sequence using lifecycle methods.
- Convert the same components or make new components class based component.
