# Session 12 - Let's build our Store

Theory:
- useContext vs Redux.
- Advantage of using Redux Toolkit over Redux.
- Explain Dispatcher.
- Explain Reducer.
- Explain slice.
- Explain selector.
- Explain createSlice and the configuration it takes.

Coding:
- Make /login page it will have basic form(login with some email, photo and name) and login button, so when we click on the button it should update the store and in the header we should see the user name and image as an icon.
